## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election of Group I (claims 1-12) and cancellation of Group II (claims 13-25) in the reply filed on 12/7/2005 are acknowledged. Further, Applicant's election of species category (I)(a) (claims 1 and 10) in the reply filed on 1/3/2006 is also acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). In summary, claims 1, 4 and 10 are commonly elected, claims 2, 3, 5-9, 11 and 12 are withdrawn.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1, 4 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat.

App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 1 recites the broad recitation "... no more than 25% ...", and the claim also recites "... preferably 20%, more preferably 16%, advantageously 12%" which is the narrower statement of the range/limitation.

#### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

#### ***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1771

6. Claims 1, 4 and 10 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Greene (US 5938993).

Greene's invention is directed to methods for producing molded articles with an outer polyurethane integral skin and an inner polyurethane foam structure, wherein the outer layer is waterproof (abstract). The molded article can be used as a seat cushion (column 2, lines 1-3).

For claim 1, Greene is silent about the hardness of the molded article, as measured by a hemispherical indenter. However, Greene does expressly disclose that precise controlled characteristics, including size, shape, hardness, etc. are obtained (column 4, lines 1-3). As such, since Greene teaches the same subject matter (an integrally molded polyurethane cushion) as instant invention, in the absence of evidence to the contrary, it is the Examiner's position that suitable hardness is either anticipated by Greene, or obviously provided by practicing the invention of prior art. It should be noted that where the claimed and prior art products are shown to be identical or substantially identical in structure or composition, or are produced by identical or substantially identical processes, a *prima facie* case of either anticipation or obviousness has been established. See MPEP § 2112.01.

For claim 4, Greene expressly teaches a highly resilient polyurethane foam core (column 5, lines 35-38).

For claim 10, Greene teaches molded articles with an outer polyurethane integral skin and an inner polyurethane foam structure, as set forth above.
